AHAVA HOME LEARNING ACADEMY

Grade 3 Language Arts | Chapter 6 | Day 2

Compare Two Texts

READ THE ORIGINAL TEXT

Text A: A rain gauge collects precipitation in a marked container. Students read the measurements after a storm. Text B: A weather station can measure rainfall, temperature and wind. Its records can compare conditions across several days. Both texts describe measurement but differ in scope.

Model and discuss: Work the first question aloud with a relevant citation, diagram or explanation. Complete the remaining questions independently; distinguish observation from inference where applicable.

INDEPENDENT QUESTIONS

1. What measurement appears in both passages?

2. Which passage discusses wind?

3. Name one difference between the devices.

4. Write a comparison sentence citing each text.

Save privately. Teacher responses are on a separate guide.
