AHAVA HOME LEARNING ACADEMY

Grade 3 History - Chapter 5 - Day 2

Waterways and Settlement

Rivers can support movement, fishing, irrigation and trade while creating flood risks. Settlements reflect many factors, including the choices of different communities. A location visible on a map is an observation; motives require historical evidence.

Model and discuss: Work the first question aloud with a relevant citation, diagram or explanation. Complete the remaining questions independently; distinguish observation from inference where applicable.

DAILY STUDENT PRACTICE

1. Give one possible benefit of a river.

2. Give one possible river-related risk.

3. A town appears beside a river: observation or inference?

4. What source could help explain settlement decisions?
