AHAVA HOME LEARNING ACADEMY

Grade 3 History - Chapter 5 - Day 3

Resources and Economic Decisions

Forests, soil, water and minerals contribute to work and trade. A resource decision can benefit some needs while harming others. For example, harvesting trees can provide materials but affect habitat and future forest supply.

Model and discuss: Work the first question aloud with a relevant citation, diagram or explanation. Complete the remaining questions independently; distinguish observation from inference where applicable.

DAILY STUDENT PRACTICE

1. Name two Alabama natural resources.

2. How does fertile soil support livelihoods?

3. Why does forestry require planning?

4. Give a benefit and cost of extracting a resource.

Print or type in each field. Keep student answers private.
