AHAVA HOME LEARNING ACADEMY

Grade 4 Language Arts | Unit 1 | Day 2

Main Idea and Evidence

READ AND LEARN

A central claim should be supported by relevant data, not a single unrepresentative example. Passage: Volunteers measured the river at three locations on one morning. The measurements differed because the locations had different channel widths.

DAILY PRACTICE

1. What did volunteers measure?

2. How many locations were used?

3. What factor varied among locations?

4. Why not generalize to all seasons?
