AHAVA HOME LEARNING ACADEMY

Grade 4 Mathematics | Unit 1 | Day 1

Multiplication by Two-Digit Factors

Use partial products. For 23 x 14, 23 x (10 + 4) = 230 + 92 = 322.
Estimate with 20 x 15 = 300 to check whether the answer is reasonable.

DAILY PRACTICE

1. 24 x 13

2. 36 x 12

3. 45 x 21

4. 18 boxes each hold 14 pencils. How many pencils?

Show your work. The x means multiply. Save your answers privately.
