AHAVA HOME LEARNING ACADEMY

Grade 6 History | Unit 1 | Day 2

River Valley Societies

READ AND LEARN

Rivers may support food production, transport and settlements. Mesopotamian urban centers developed between the Tigris and Euphrates; ancient Egyptian settlements relied heavily on the Nile. These histories unfolded over long periods.

DAILY PRACTICE

1. Name a river associated with ancient Egypt.

2. Name two rivers associated with Mesopotamia.

3. Name one potential settlement benefit.

4. Does river access alone explain political systems?
