AHAVA HOME LEARNING ACADEMY

Grade 2 Science | Unit 1 | Day 4

Evidence and Explanation

READ AND LEARN

An observation is a measurement or description made directly. An inference is an explanation supported by evidence. If a seedling is 2 cm taller after a week, growth was observed. The reason for that growth requires more evidence.

DAILY WORK: TYPE IN FIELDS OR PRINT AND WRITE

1. What was measured if height rose from 7 cm to 9 cm?

2. How much did height increase?

3. Does this prove extra light caused the increase?

4. What additional records would help explain the change?
