AHAVA HOME LEARNING ACADEMY

Kindergarten Science | Unit 1 | Day 2

Observe Carefully

READ, OBSERVE AND LEARN

A scientific observation tells what you actually sense or measure. Look at a safe leaf or photograph. Its color, outline and visible veins are observations. Saying it is the oldest leaf in the garden without evidence is a guess.

DAILY INDEPENDENT PRACTICE

1. Describe a leaf’s observed color.

2. Draw its outline.

3. Say one thing you can see and one thing you cannot know from one picture.

4. What tool helps look closely without touching an unknown object?

Fill in the fields or print. Do not enter private learner information.
