STUDENT WORKBOOK - Unit 1

Mathematics only. No Language Arts, Science, History or Scripture assignments appear in this workbook.

Lesson 1: Counting, writing numbers, and addition within ten

Learn the Concept

Teacher explanation: A number tells how many objects are in a group. Count each item once. To add 3 and 2, draw 3 dots and 2 dots, then count all 5. A ten-frame holds ten boxes in two rows of five.

Guided Example

Read the example in the lesson explanation. Use a drawing, number line, manipulatives or written equation to explain each step to a parent or teacher.

Independent Practice: 8 Problems

1. Draw 4 circles and write the number.

2. Count the dots: - - - - - -. Write the number.

3. Write numbers 1 through 10 in order.

4. Fill in: 3, 4, __, 6, __.

5. Circle the greater number: 7 or 5.

6. Draw 3 dots and 2 dots. How many in all?

7. Use counters to show 6 take away 2. How many remain?

8. Show 8 as five and three using a drawing.

Check Your Work

Show the steps for at least two problems and explain how you know your answer is reasonable. If you find an error, correct it and try a different example.

Advanced Scholar Extension

When these problems are easy, use the next grade’s mathematics unit or the Advanced Scholars pathway after showing mastery. Do not accelerate solely because of age.
